

MULTIFUNCTION PRINTERS

Printing and copying that just works.

One copier jams, another is barely used, and nobody remembers when the contract ends.

Sized to your floors

Matched to the work happening around it, so you never pay for capacity nobody uses.

Service that shows up

Factory-certified technicians who know your machines, not a dispatch queue.

Clear terms, no surprises

Equipment, supplies, and service together, with the renewal date told to you up front.

Local team, regional reach

A local team you know by name, backed by regional coverage and real scale.

THE PART YOU ONLY NOTICE THREE YEARS IN

Technicians certified by the manufacturer

Trained on every line we sell, so the person who arrives already knows your machine.

Escalation specialists behind them

Senior techs standing behind the field team when a fault needs more than one visit.

Remote and onsite

Many issues are cleared remotely, with no wait for a truck. When they are not, someone comes.

Boston to Philadelphia

Local relationships and local response, with the reach and scale of a regional operation behind it.

Not sure what you are running today?

Most offices cannot say how many devices they have, what each one costs, or when the lease renews. We will walk your floors and map it for you — and you keep the map either way.

Book a free fleet walkthrough

Three lines, so the machine fits the room.

We are an authorized dealer for all three — so we recommend the machine that suits your floor, not the only one we carry.

Canon

imageFORCE

Canon's flagship platform, built to bring light-production quality into an everyday office. D² Exposure prints at 4800 x 2400 dpi on coated, heavy, and synthetic stock, and firmware updates keep adding features without new hardware.

- Up to 65 ppm, scanning at 270 images per minute
- Keypoint Intelligence 2026 A3 Line of the Year

SHARP

BP Series

Sharp's A3 workgroup line — Advanced and Essentials, 26 to 65 pages per minute in color or mono — all on one shared platform, so every device behaves the same way.

- Native Microsoft Entra ID and Teams integration
- Intrusion detection, with optional Bitdefender antivirus

brother

Workhorse Series

Compact letter-size all-in-ones for steady daily volume, offered on Aztec's Brother Unlimited subscription — hardware, toner, and service in one monthly cost, with no page counts.

- MFC-L9670CDN prints 42 ppm in color and mono
- Triple Layer Security, and a BLI Pick Award winner

FULLY MANAGED, FROM DAY ONE

What comes with the machine

1

Assessed

Every device matched to the work around it.

2

Installed

Delivered, networked, and set up for your print queues.

3

Trained

An on-site walkthrough for your whole team.

4

Supplied

Toner arrives before you run out.

5

Supported

Monitored remotely and serviced onsite, all in one portal.

Ready to stop guessing about your fleet?

Book a walkthrough and we will map every device, flag the ones that are wrong for the floor, and find your renewal date before it passes.
